## Apache 2.4 VS16 Windows Binaries and Modules

Apache Lounge has provided up-to-date Windows binaries and popular third-party modules for more than 15 years. We have hundreds of thousands of satisfied users: small and big companies as well as home users. Always build with up to date dependencies and latest compilers, and tested thorough. The binaries are referenced by the ASF, Microsoft, PHP etc. and more and more software is packaged with our binaries and modules.

The binaries, are build with the sources from ASF at <http://httpd.apache.org>, contains the latest patches and latest dependencies like zlib, openssl etc. which makes the downloads here mostly more actual then downloads from other places. The binaries **do not run** on XP and 2003. Runs on: 7 SP1, Vista SP2, 8/8.1, 10, 11 Server 2008 SP2 / R2 SP1, Server 2012 / R2, Server 2016/2019/2022.

Build with the latest Windows® Visual Studio C++ 2019 aka VS16. VS16 has improvements, fixes and optimizations over VC15 in areas like Performance, MemoryManagement, New standard conformance features, Code generation and stability. For example code quality tuning and improvements done across different code generation areas for "speed". And makes more use of latest processors and supported Windows editions (win7 and up) internal features.

**VS16 is backward compatible**, see [Compatibility VS16](#). You can use a VC15/14 module inside a VS16 binary, for example PHP VC15/14 as module.

**Be sure you installed latest 14.29.30135.0 Visual C++ Redistributable for Visual Studio 2015-2019 : [vc\\_redist\\_x64](#) or [vc\\_redist\\_x86](#) see [Redistributable](#)**
